

# DARSHAN AMANE

Ichalkaranji, Maharashtra

+91-8857043460   darshanamane083@gmail.com   LinkedIn   GitHub

## Summary

---

Artificial Intelligence and Data Science undergraduate (graduating 2027) with hands-on experience in software development, machine learning, data analysis, and generative AI. Proficient in Python, Java, C, and JavaScript with strong foundations in object-oriented design, data structures, algorithms, and complexity analysis. Experienced building AI-powered applications, REST APIs, and full-stack distributed solutions. Passionate about scalable systems, agile development, and delivering customer-centric software.

## Skills

---

**Languages:** Python, Java, C, JavaScript, SQL (MySQL)

**Frameworks / Libraries:** Flask, React Native, Streamlit, LangChain, Pandas, NumPy, Scikit-learn

**Tools / Platforms:** Git, GitHub, AWS Cloud, VS Code, Power BI, LM Studio

**Concepts:** Object-Oriented Design, Data Structures & Algorithms, Distributed Systems, Machine Learning, Generative AI, REST APIs, Database Management Systems (DBMS), Agile Development, Scalability, Complexity Analysis

## Experience

---

### Generative AI Intern

Dec 2025 – Jan 2026

*Sunbeam Institute of Information Technology*

*Pune, India*

- Developed 3+ AI-powered web applications using Python, Streamlit, and LLM APIs, implementing file upload workflows, data processing pipelines, and interactive application logic.
- Executed 20+ SQL queries with Pandasql on Pandas DataFrames for data extraction, filtering, aggregation, and insight generation from large structured datasets.
- Built LangChain-based AI agents implementing multi-step reasoning, automated query analysis, and intelligent response generation using large language model APIs.
- Integrated and evaluated local LLMs using LM Studio, enabling offline inference and iterative AI model experimentation on distributed local environments.

## Projects

---

### Smart Tourist Safety Monitoring System | *React Native, Python Flask, MySQL*

2026

- Designed and built a full-stack tourist safety platform featuring women safety alerts, local guide discovery, safety equipment rental, multilingual translation, and emergency assistance modules.
- Implemented a complaint management system and location-based price verification engine to detect overpricing and reduce fraudulent pricing practices for tourists.
- Developed a geo-fencing-based crowd prediction module using real-time location analysis to monitor crowd density and proactively enhance tourist safety.

### AI-Based Data Analyzer | *Python, Streamlit, LangChain, Pandasql*

2026

- Created an AI-powered data analysis tool for processing structured tabular datasets; supports CSV uploads of 10,000+ rows for interactive data exploration.
- Executed SQL queries via Pandasql against Pandas DataFrames to retrieve, filter, and aggregate insights from large datasets at scale.
- Automated dataset summarization and query analysis using LLM-based processing with LangChain, enabling natural-language interaction with structured data.

## Education

---

### D.K.T.E. Society's Textile & Engineering Institute

2023 – 2027

*B.Tech in Artificial Intelligence & Data Science (CGPA: 8.09)*

*Ichalkaranji, India*

### Govindrao Jr. College

2021 – 2023

*HSC – 12th Board (68.17%)*

*Ichalkaranji, India*

## Certifications

---

- Data Engineering using AWS – Amazon Web Services (AWS)
- AI-ML Virtual Internship – Google
